

## Compliance with Legislative Decree 116/2020 and EU Directives 2018/851, 2018/852

We hereby inform you that all packaging of our products complies with current environmental labeling regulations.

In accordance with Legislative Decree 116/2020, which transposes (EU) Directive 2018/851 on waste and EU Directive 2018/852 on packaging and packaging waste, we have adopted provisions aimed at facilitating collection, reuse, and recycling of packaging, providing consumers with clear and transparent information.

Specifically, it is required that all packaging be *“appropriately labeled according to the methods established by applicable UNI technical standards and in compliance with the determinations adopted by the European Commission, to facilitate the collection, reuse, recovery, and recycling of packaging, as well as to provide correct information to consumers on the final destinations of packaging.”* Following the guidelines provided by recycling and disposal consortia, the minimum mandatory information to be included on labels for B2C (business-to-consumer) products is as follows:

- 1) Type of packaging (written description or graphic representation),
- 2) Material identification (alphanumeric code according to Decision 97/129/EC),
- 3) Material family and indication of the type of collection (separated or unsorted).

We also remind you of the rules for sustainable disposal of packaging waste:

- Check the possibility of reusing the packaging,
- Empty the packaging before disposal,
- Check the code on the packaging to ensure correct disposal,
- Refer to the code shown in the table below,
- Reduce the volume of the packaging,
- Check the regulations of your local municipality.

## Materials used in our packaging:

Packaging	Type of Packaging	Material Identification	Material Family and Type of Collection
Cardboard box	Case: outer packaging		Paper / Separate collection
Cardboard display	Display		Paper / Separate collection
Polypropylene flow-pack	Flow-pack : Inner packaging		Plastic / Separate collection
